

LED Lighting Solutions

Commercial | Residential | Decorative | Landscape

We are redefining lighting for **generations.**

4+ Decades of Innovation

Pioneers in India's
LED Lighting Industry

Global Excellence with
Cost-Effective Solutions

In-House Design and Manufacturing

Our story spans over four decades of unwavering commitment to quality, innovation, and sustainability. Founded in 1979, Noble Electricals began with a bold vision: to light up India with **tech-driven, high-quality lighting solutions.**

As one of **India's pioneering LED manufacturers**, our mission is to seamlessly combine world-class quality with a price-conscious approach. We are dedicated to ensuring that India has access to cutting edge lighting solutions — without compromise — while upholding global standards of excellence.

Our core competence lies in the **in-house development and manufacturing** of cutting-edge LED lighting products. We take pride in delivering customised lighting solutions tailored to the unique needs of our clients. Whether it's through our **OEM partnerships, extensive dealer network, or collaborations with architects and consultants**, we ensure that our products meet the highest standards of performance and design.

1979

Founded by Shri Ramji Dass Bajaj with a vision to revolutionise the Indian lighting landscape.

1988

Entered the manufacturing sector with a strong foothold in the production of conduit pipes and accessories.

2008

Pioneered the LED manufacturing movement in India.

2010

Expanded its footprint into multiple industries, diversifying its product range.

2011

Became OEM for some of India's top brands, cementing its reputation in the market.

2025

On track to become the leader in the Indian lighting market with plans for cutting-edge innovations.

2020

Launched India's first non-magnetic profile light, a groundbreaking innovation in the lighting industry.

2018

Achieved a significant milestone expanding its distribution network and deepening its reach across the country.

Where innovation meets New possibilities

This year marks a meaningful leap in our innovation journey. Guided by extensive research, market insights and collaborations with architects and consultants, we've introduced new additions and refined variants across key lighting categories.

Each upgrade has been engineered with a sharper focus on precision, efficiency, and modern design from compact downlights to an expanded linear lighting range and enhanced landscape solutions.

Every product reflects Noble's commitment to tech-driven, high-quality lighting for contemporary spaces.

Browse through the catalogue to explore all new introductions and evolved ranges for 2025 and beyond.

Our edge? An eye for trends, a passion for technology, and a heart that's conscious of pricing.

Tomorrow's technology, today

Our agile approach to innovation helps us make advanced solutions accessible to India before the rest of the world.

Sharp understanding of the Indian market

Tailored offerings to meet critical parameters such as design, safety, and range.

In-house manufacturing

Our years of expertise and resources enable us to control our processes, ensuring the highest quality standards.

Robust distribution channel

By fully leveraging demand and supply advances, we ensure our solutions meet client timelines.

SUSTAINABILITY IN EVERY SPARK.

We believe in being people-first, planet-friendly, and tech-forward. Our commitment to the planet drives us to innovate with purpose. Noble's very birth celebrates the belief that **innovation and sustainability can co-exist**.

Our dedicated R&D team continuously pushes the boundaries of green technology, ensuring our products are **energy-efficient, with reduced carbon footprints and longer product life cycles, leaving minimal environmental impact**. We are lighting the way to a cleaner future — solutions that shine bright but are also kind to the planet.

LED LINEAR LIGHTING

LINEAR LIGHTING

Linear Light is the use of many Light emitting diodes "LED's" Packaged together in a long narrow housing to create a diffused strip of light. This simple concept has revolutionized the way we light up spaces

We integrate premium components to enhance our product performance.

Smart control at a tap.

LED SPOT LIGHTING

Designed to focus light on a specific area. Enhances focal points like artwork or accent pieces. Creates drama and depth!

We integrate premium components to enhance our product performance.

Smart control at a tap.

Features:-

- Movable & non movable twin Downlight
- Colored reflector options also available
- Front loading option also available
- Trimless variant available

LED ZOOM & LOTUS MOVABLE DOWNLIGHT

Features:-

- Recess mounted adjustable spot light
- Ideal replacement for CDMT & halogen spot lights
- Ideal for high intensity directional lighting from a point source
- The fixture can be adjusted in such a manner that it comes out of the ceiling

SIZE OPTIONS IN HEAVY PROFILE

(300 / 600/ 1000/ 1200MM)
(15w / 30w / 45w /60w)
12 FEET LENGTH ALSO AVAILABLE

features:-

- Available in extruded aluminum body
- Linear light to wash the facade of a building
- Available in RGB, RGBW & with DMX controller system
- Very good vertical throw of the light
- Also available in higher wattage

LED INGROUND BURIAL

LED INGROUND MINI 24v DC

Features:-

- Premium LED inground burials
- Available in very small size in 10 mm cutout
- Also can give with honeycomb mesh
- Made out of SS Body
- Available with Aluminum heat sink & poly carbonate casing
